

Asset Management Contract

Florida's Turnpike Enterprise has just completed its first year of an innovative performance-based contract for asset management of Suncoast Parkway, Veterans Expressway, and Polk Parkway. Infrastructure Corporation of America (ICA) has maintained a 96.33 Maintenance Rating Program (MRP) score; well above the Turnpike average and in line with previous year's performance ratings. Cost savings of up to 15 percent will be realized as the contract transitions from the Department's maintenance contracts to ICA's methods of maintenance. Performance standards have ensured that not only are the maintenance standards being met, but the Enterprise's vision, mission and values are supported.
